

SIXTH ANNUAL REPORT

OF THE

Directors & Superintendent

OF THE

✓
WEST VIRGINIA HOSPITAL FOR THE INSANE,

For the year 1869.

(6) 1868-9

FROM DR. J. C. HUPP,

Office and Residence Corner Fifth and Quincy Streets.

WHEELING:

JOHN FREW, PUBLIC PRINTER.

1870.

OFFICERS.

DIRECTORS:

NATHAN GOFF, *President.*

JAMES C. MCGREW,

D. M. BAILEY,

S. G. SHAW, M.D.,

JACOB HORN BROOK,

D. D. T. FARNSWORTH,

JAMES L. SANDFORD.

R. HILLS, M.D., - - *Medical Superintendent.*

A. H. KUNST, M.D., - *Assistant Physician.*

MRS. E. G. HILLS, - - *Matron.*

MRS. FANNY ELY, - - *Assistant Matron.*

R. J. McCANDLISH, - - *Treasurer.*

DIRECTORS' REPORT.

To His Excellency, W. E. STEVENSON,

Governor of West Virginia:

The Directors of the West Virginia Hospital for the Insane have the honor to present to you their sixth annual report, being for the year ending September 30th, 1869.

Owing to the want of the necessary funds, no work has been done during the year upon the construction of the Hospital building, except the preparation of a small amount of material for future use.

The Legislature at its last session, *at the foot* of the general appropriation bill, appropriated: "for construction of the West Virginia Hospital for the Insane, forty thousand dollars; *provided, that this appropriation shall not be paid unless there is sufficient money in the treasury to provide for all the foregoing appropriations.*"

The contingency upon which the payment of this appropriation of forty thousand dollars was made to depend, was of such an uncertain character that the Board deemed it prudent not to resume active operations, or enter into contracts for the prosecution of the work, upon the strength of it; and they are now, at the close of the year, fully convinced that the course adopted was the right one. A different one would almost inevitably have led to embarrassment.

At the close of the year 1868, there were sundry outstanding debts, amounting to a considerable sum, for labor done and material had, and contracts existing for material to be delivered, together with a small balance due the Treasurer of the Hospital, for money advanced; all of which have been brought into the accounts for the year, and principally liquidated.

At the same date there was a balance remaining in the State Treasury of the appropriation of June, 1868, and the Legislature, at its last session, placed an additional sum of \$10,000 at the disposal of the Superintendent and Board of Directors. These sums have been sufficient to meet all outstanding obligations, and defray the cost of the year's operations; leaving a small balance in the treasury of the Hospital.

At the May meeting of the Directors, Geo. A. Jackson, the Treasurer,

being absent on important business for the State, which rendered his return uncertain, the Board was under the necessity of appointing another Treasurer to take his place. This fact is mentioned to explain why the Treasurer's statement is made by two individuals.

It being impracticable to embody the *items* of the year's expenditure in this report, we submit the statements of the former and present Treasurer, which exhibit the receipts and disbursements on account of construction, and the present condition of the fund. The statement of Geo. A. Jackson embraces the period between the close of the last fiscal year and the appointment of his successor; and that of R. J. McCandlish the residue of the year.

By an examination of these statements, it will appear that there has been drawn from the treasury of the State during the year, on account of construction, the sum of \$32,000 00, and received from other sources (material sold, etc.) \$153 86—in all, \$32,153 86; and that there has been paid out on the same account, an aggregate of \$30,886 73, leaving in the hands of the former and present Treasurer an aggregate balance of \$1,267 13.

A supplemental statement, however, from Mr. Jackson shows that there is an additional sum of \$448 56 remaining in his hands, made up of items on the *time pay rolls* of September, October, November and December, 1868, which have not been called for, but which are included in the debits of his general statement.

There are a few inconsiderable debts outstanding which have not been audited, but will have to be paid out of the balance in the Treasurer's hands, as above stated.

The operations of the year, involving an outlay of money, have been so varied as to be difficult to enumerate or describe. The stone meat-house, in course of construction at the date of the last report, has been completed. It is 22 by 32 feet. A stone gas-house, 20 by 25 feet, covered with slate, has been built; the grounds in front of the building, containing a number of acres, have been inclosed by a picket fence, with a division fence of a similar kind, separating that portion of the enclosure immediately in front of the occupied part of the building from that portion of it where the machinery, sheds and work-shops are situated; a considerable amount of grading of the grounds, both in front and rear of the building, has been done; roads have been laid out and stoned; shrubbery has been planted; drains have been laid to carry off the water that would otherwise find its way to the foundations and the basement of the building; rubbish which had accumulated in the basement while the building was in course of erection has been removed and the walls whitewashed; needed articles of furniture and additional utensils have been added; kitchen conveniences have been increased; a

considerable amount of exterior painting has been done; a large number of logs have been sawed into dimension lumber for future use in construction; the breach in the street of Weston, made by quarrying rock for the walls of the building, has been repaired, as was contracted to be done; a large quantity of limestone has been procured; 75,000 feet of prime oak flooring, contracted for previous to our last report, has been received, and carefully piled and protected from the weather.

The Directors feel it to be their duty to call your especial and careful attention to the *pressing necessity* for additional room, and beg to refer you to what is said upon this subject in their report of last year; and to the report of the Medical Superintendent herewith; and particularly the statement of the number refused admission for want of room. We respectfully renew our recommendation of last year, that the sum of \$60,000 be appropriated by the Legislature at its next session, to continue the work of construction.

The Legislature, at its last session, passed a joint resolution in these words: "Resolved by the Legislature of West Virginia, that the Board of Directors and Superintendent of the West Virginia Hospital for the Insane * * * are hereby requested, in their next annual report, to state the amount of money expended to date of report, and the probable amount of money and time required to complete the buildings, with the necessary out-buildings."

In attempting to comply with the request contained in the foregoing resolution, we propose to do so somewhat more specifically than the resolution seems to demand; but we do so in order, if possible, that a full and correct understanding of the subject involved may be reached, and the Legislature and the country fully informed; and in doing so, we beg leave to present a complete statement of all the several appropriations which have been made for the erection of this Hospital by the General Assembly of "Old Virginia" and the "Restored Virginia," and also by the Legislature of West Virginia, which is as follows, viz:

By Old Virginia, March 22, 1858, Acts 1857-8, p. 117.....	\$25,000 00
Jan. 6, 1860, Acts 1859-60, p. 105.....	100,000 00

Total by Old Virginia.....	\$125,000 00
----------------------------	--------------

(March 17, 1860, Acts 1859-60, p. 81, \$50,000 00. This was never drawn from the State Treasury; the State Convention repealed the Act by Ordinance passed June 28, 1861.)

In the summer of 1861, the authorities of the Restored Government of Virginia, took from the Exchange Bank of Virginia at Weston, and carried to Wheeling, the sum of \$27,000 00, which was a portion of the above recited sum of \$125,000 00. It was ultimately restored to the Hospital, as will be seen on the following page:

By the "Restored" Virginia:

July 1861, Joint Resolution No. 5, acts p. 24†.....	\$ 5,317 00
January 14, 1862, acts 1861-2, p. 15†.....	21,683 00
January 27, 1863, acts 1862-3, p. 23.....	40,000 00

\$67,000 00

From this deduct the \$27,000 carried away from Weston... 27,000 00

Actual amount appropriated by "Restored" Virginia..... \$40,000 00

By West Virginia:

March 2, 1864—acts 1864, p. 32.....	\$ 6,000 00
March 1, 1865—acts 1865, p. 73.....	5,000 00
March 1, 1866—acts 1866, p. 126.....	75,000 00
February 18, 1867—acts 1867, p. 43.....	100,000 00
March 5, 1868—acts 1868, p. 144.....	2,000 00
June 26, 1868—Extra Session, 1868, p. 8.....	30,000 00
March 4, 1869—acts 1869, p. 95..	10,000 00

Total by West Virginia*..... \$228,000 00

RECAPITULATION.

Appropriated by Old Virginia.....	\$125,000 00
" by Restored Virginia.....	40,000 00
" by West Virginia.....	228,000 00

Total amount of appropriations which were drawn from the State treasurers..... \$393,000 00

The original Board of Directors purchased, as a site for the Hospital, eight different parcels of land, adjoining each other, and aggregating 273 acres, for which they paid the sum of \$12,409 12 out of the appropriations made by Old Virginia.

When the rebellion broke out, the work upon the foundations of the building was in progress, and there was at that time a large quantity of lumber on hand, carefully piled upon the Hospital grounds. There was also a large number of tools on hand, necessary for carrying on the work. During the years 1861, 1862 and 1863, much of this property was forcibly taken possession of and carried away by the soldiers of the contending armies, without compensation to the State; the soldiers of the Union getting, as is believed, much the larger share. It is difficult, and indeed impossible, to ascertain correctly, the value of the property thus carried away, and lost to the Hospital and the State. Five thousand dollars (\$5,000) would probably be a low estimate.

Then again, in 1864, just before the Hospital was opened, it was robbed by rebel raiders of its supply of blankets, bedding, &c. A second pur-

†These two appropriations were made to restore the \$27,000 taken from the Treas. of the Hospital, at Weston, in 1861.

*The last appropriation of \$40,000, made by West Virginia, being a conditional one, has not been drawn from the treasury of the State.

chase, made in Baltimore to supply this loss, was captured by rebel raiders, in transit over the B. & O. R. R., and a third purchase had to be made. By these robberies an additional loss was sustained of about \$3,000.

There is on hand, and available in the further prosecution of the work, the following property, viz:

200 perch of stone, dimension and rubble, worth.....	\$ 600 00
15,000 brick,	90 00
Lime and lime-stone, equal to 4,100 bush.	388 00
300 wagon loads building sand,	100 00
23,000 feet, 1st quality poplar lumber,	} " 2,339 00
10,000 " 2d " " "	
75,000 " prime oak flooring,	
Sundry tools, derricks, rope, &c.,	" 550 00
2 wagons and 1 cart,	" 300 00
1 yoke work oxen,	" 140 00
3 heavy draft horses,	" 405 00
1 set blacksmith's tools,	" 100 00
1 portable steam engine & boiler, and saw-mill	" 1,250 00
1 Woodward's planing machine,	" 400 00
1 ripping-table and saws,	" 50 00
1 brick machine, new, for steam-power, ca- } pable of making 20,000 brick per day, }	" 1,200 00
2 lime kilns,	" 150 00
1 Fairbank's hay scale, in position,	" 250 00
Shops, sheds, dry-house for lumber, &c.,	" 1,000 00

Total.....	\$9,312 00
------------	------------

From the foregoing data, we deduce the following

STATEMENT.

Total appropriations by Old Virginia.....		\$125,000 00
“ “ by Restored Virginia.....		40,000 00
“ “ by West Virginia.....		228,000 00
“ “ drawn.....		\$393,000 00
Deduct estimated value of lumber and tools taken by military.....	\$ 5,000 00	
Deduct blankets, &c., taken by confederates	3,000 00	
Deduct funds on hands, less debts due.....	1,140 00	9,140 00
Total sum expended for buildings, furniture, material on hand, and land.....		\$383,860 00
Deduct amount paid for land.....		12,409 12
Total sum expended for buildings, furniture and material on hands.....		\$371,450 88
Deduct value of material on hand.....		9,312 00
Total sum expended for buildings and furniture....		\$362,138 88

This sum of \$362,138 88, embraces the cost not only of the Hospital building, but also one brick boiler-house, and laundry, one frame barn; one stone meat-house, one stone gas-house, gas apparatus, steam boilers and heating fixtures; one stationary steam engine and boiler; laundry fixtures and apparatus; three steam pumps for raising water; wells and cistern to supply water; enclosing grounds, and *furniture*, which last item includes the *first supply* of medical stores, crockery, cutlery, kitchen utensils and fixtures necessary to open the Hospital, as well as all the *first supply* of beds, bedding, *furniture properly, so called*, &c., necessary fully to supply the different sections as they were finished and opened.

At the present prices for material and labor, we estimate the sum necessary to complete the building according to the original plan, at from \$300,000 to \$325,000.

With the necessary funds at command, and a due regard to economy, *three years* would probably be necessary to complete the building. It might be done in less time, and it might be prolonged indefinitely.

The Board have occasionally discussed the feasibility of changing the plan of the building, so as to obtain the same or a greater amount of room at less cost. The practicability of doing so, has almost reached a condition of conviction in the minds of a number of the directors, and they all consider it a matter worthy the consideration of the Executive and the Legislature of the State, if it shall be determined to proceed with the work of construction, and especially so, as the Board might not feel at liberty to make so radical a change in the plan, without direct authority of law.

In this connection, we deem it proper to state that if the original plan is carried out additional land must be acquired, as the whole of the north one-story wing will have to be built on land not now belonging to the Hospital.

The cost of the land necessary to be acquired, is not embraced in the above estimate of the cost of finishing the building.

INTERNAL AFFAIRS OF THE HOSPITAL.

The Annual Report of the Medical Superintendent, Dr. R. Hills, to the Board of Directors, accompanies this, and will be considered as constituting a very important part of it. It presents the workings of the institution in minute and interesting detail, and we respectfully request a careful examination of it.

The Directors are happy to be able to say that during the year the household has been very graciously spared from either epidemic or endemic disease. The deaths which have occurred were from different causes, peculiar to the several cases.

At the close of the year 1868, there were remaining in the hospital 180, at the close of 1869, there are 202.

The average number in the Hospital in the year 1868, was 132, in 1869, the average number has been 199, and the highest number at any one time during the year, 206.

A combination of circumstances,—partially detailed by the Medical Superintendent in his report—has enabled us to bring the aggregate cost of maintaining the Hospital for the year, as well as the average cost *per capita*, largely within the estimates.

A reference to our last report will show the estimates to have been on the basis of an average number of 200 patients, at \$3 25 per week *per capita*, equal to \$33,800, and for transportation, \$2,250, in all \$36,050. As above stated, the average number of patients has been 199; the aggregate expense, \$29,239 59; the average *per capita* per week, \$2 54.

This is a result gratifying to the Directors, and will doubtless be no less so to the tax-payers of the State, and especially so, under the assurance that the money expended has been quite sufficient for the comfort of the patients in respect to clothing, food, lodging, attendance, &c., and indeed in all the essential requisites of an insane hospital, with the exception, perhaps, of *sufficient means of in-door recreation and amusement* and clean water.

In addition to the causes named by the Medical Superintendent, which have aided in reducing the aggregate expenses, it is proper we should mention an additional cause for the reduction of the *per capita* expense; and that is this: While the average increase in the number of patients in the Hospital the past year has been *fifty-one per cent* over that of 1868, there has been no increase in officers' salaries, and an increase of only *fifteen and one-half per cent* in the cost of attendance, which alone is equal to *thirty-seven cents per capita* per week, and \$19 24 per annum. While money has by this means been saved to the State, it has involved a good deal of hard labor on the part of those whose duty it is to give personal attention to the wants of the inmates, as well as to the Superintendent and his assistant, the Matron and her assistant.

The Medical Superintendent draws the funds for current expenses from the Treasurer of the Hospital, on the warrants of the Executive Committee of the Board, and disburses them. His accounts have been carefully examined and compared with the vouchers he presents for each and every item of expenditure, and have been found to be correct, and kept with entire exactitude.

We append hereto the statements of the Treasurers of the Hospital, of the fund for current expenses, and we respectfully refer you to them. From them and the more detailed statements of the Medical Superintendent, it will appear that—

The balance in hands of Treasurer and Medical Superintendent, Sept. 30, 1868, was.....	\$ 2,618 91
Amount drawn since that day from the State Treasury by Geo. A. Jackson.....	15,000 00
Amount drawn since that day from the State Treasury by R. J. McCandlish.....	21,500 00
Am't received from pay-patients and other sources by Dr. Hills, Medical Superintendent.....	567 07
Total amt. received into treasury of Hospital	\$39,685 98
Expended in maintenance of Hospital.....	29,239 59
Balance on hand Sept. 30th, 1869.....	\$10,446 39
Of which sum there is in the hands of—	
Geo. A. Jackson, former Treasurer	\$ 459 76
R. J. McCandlish, Treasurer.....	6,000 00
Dr. R. Hills, Medical Superintendent.....	3,986 63
	\$10,446 39

On the 4th of March, 1869, the Legislature appropriated \$25,000 for current expenses of the year. Of this appropriation, there remains a balance of \$3,500, which has not been drawn from the State treasury. It is estimated that this balance, together with the balance on hand as above stated, will be sufficient,—but barely so—to meet the expenses until the Legislature will probably make another appropriation.

For the ensuing year, our estimates are:

For current expenses proper.....	\$31,200 00
For transportation of patients.....	2,500 00
To enlarge and improve laundry.....	800 00
Total.....	\$34,500 00

We respectfully repeat the suggestion made in former reports, that whatever sum may be appropriated for *transportation* of patients, be made a *separate and distinct fund* from that of current expenses.

The sum asked for to enlarge and improve the laundry, is made necessary from the fact that the washing machine and other fixtures now used are those that were first put in, when we had but few to wash for, and the further fact that they are not *all* of sufficient capacity to do the requisite amount of work in a given time. *To insure cleanliness of beds and personal clothing for the household, we must have an effective laundry,* and to insure health, we must have cleanliness.

One of the prime necessities of an institution like this, is *an abundant and never-failing supply of pure water*. This, our hospital has not, and cannot have without additional facilities for procuring it. We have alluded to this subject in former reports, and indicated therein the probable necessity, at some future time, of adopting the plan we are about to recommend. The spring on the hill-side, which, as we understand, was

considered sufficient by those who located the Hospital here, to supply it with water, has failed for the last three years to afford more than about one-third the required quantity. Its primary sources are probably drying up, or finding other outlets. In consequence of this, we have been forced to various expedients to supply the deficiency. Two wells were dug, a rain-water cistern of one thousand barrel capacity was constructed; but all these and the spring, proved inadequate, and we were finally driven to the necessity of procuring a powerful steam pump, which was placed in the basement of the building, and pipes laid to the West Fork river. This is now our chief reliance, and when the water in the river is at an ordinary stage, and *not muddy*, it furnishes clear water in sufficient quantity for present wants.

The objections to the present arrangement, are: *First*, When the water in the river is at a low stage, which often occurs in summer, and is sometimes of long continuance, the pump, although a powerful one, is not sufficient to overcome the resistance through the unusual length of *one thousand feet of suction and a perpendicular lift of twenty-four feet*. *Second*, When there is a rise in the water of the river, it generally becomes very muddy, and continues so for days—sometimes weeks—together, and is unfit for use, either in the laundry, the wash rooms or bathing tubs. *Third*, It is first pumped into the cistern, thence by another steam pump into the tanks in the attic of the building, thus involving the expense of *twice* pumping, which is no inconsiderable item.

The plan which has suggested itself to our minds, as the proper one to be adopted to overcome these difficulties and secure what the Hospital *must have*—plenty of pure water—and the one we propose to carry out, if the means to do so are placed at our command, is to construct a reservoir of sufficient capacity on the side of the hill immediately below the spring, so as to secure all the water it may supply,—and at an elevation sufficient to force the water over the highest part of the roof of the building. The pump to be placed at the margin of the river, about 750 feet distant from the reservoir, and the water forced up the ascent. The reservoir to be constructed with two or more compartments, so that after the water is pumped into it, muddy from the river, it can be filtered, or allowed to settle and become clear, before passing into the building for use.

To do this will probably require \$5,000, and we earnestly commend it to your favorable consideration and that of the Legislature.

Unlike similar institutions in the United States, as well as in Europe, this Hospital is almost entirely destitute of proper appurtenances and resources for recreation and amusement for patients. This defect is radical and serious, and ought to be remedied. With any one at all acquainted with life in a lunatic hospital, no argument is necessary, beyond the evi-

dence of their own senses and good judgment, to convince them of the truth of this proposition. Having frequently, but unsuccessfully, alluded to this subject in former reports, and urged the necessity that something should be done in this direction, we would not recur to it now, were it not that we feel that should we fail to do so, we would be guilty of a criminal neglect of duty to those whom misfortune has placed under our immediate care and the care of the State.

Having said this much, we rest the matter in the hands of those whose right it is to control, and who, we trust, may see it to be their duty to act.

The report of the Medical Superintendent shows, that since the Hospital was first opened in 1864, there have been 530 applications for admission; 303 of whom have been admitted, and 227 refused admission for *want of room*—the probable number waiting for room 150—and that room for 350, including the inmates—is needed at the present time to accommodate *all* the lunatics now in the State.

This condition of things, clearly indicates the necessity and propriety of pushing the work of construction to completion as rapidly as the financial resources of the State treasury will admit.

We commend the institution to your favorable consideration, and that of the Legislature of the State.

Respectfully Submitted;

By order of the Board,

NATHAN GOFF,

President.

SUPERINTENDENT'S REPORT.

To the Board of Directors of the West Virginia Hospital for the Insane:

GENTLEMEN: I herewith present to you my *Sixth Annual Report*.

The usual summary is given in the following figures:

	Males.	Females.	Total.
Remaining in Hospital Oct. 1, 1868.....	97	83	180
Admitted during the year.....	22	29	51
Total number under treatment.....	119	111	231
DISCHARGES.			
Recovered.....	5	8	13
Improved.....	2	0	2
Unimproved.....	2	1	3
Died.....	5	6	11
Total.....	14	15	29
Remaining in Hospital Oct. 1, 1869.....	105	97	202
Average number during the year, (daily).....			199

The increase from the number in the Hospital at the date of the last report was immediate and steady until the number reached the maximum that it is possible for us to have in the institution at any one time until it is enlarged. That number is about *two hundred*. It is practicable to vary the figures by a few, it is true. The highest yet reached—by severe crowding—being *two hundred and six*. The number has never been less than two hundred since first reaching that figure, and it has been our effort to keep the number as nearly as possible in that vicinity.

The following are our usual tables, to which we think it unnecessary to add more until our foundation for statistics is made broader:

TABULAR STATEMENT OF ALL UNDER TREATMENT DURING THE YEAR.

Entry Number.	Date of Admission		Sex.	Social Condition.	Number of Attacks.	No. of Admissions.	Duration of Insanity.	Supposed Cause.	Form of Insanity	Age at first Attack.	Hereditary.	Occupation.	Nativity.	Residence.	Result.

CASES DECLINED OR DEFERRED.

Since the opening of the Hospital in 1864 the number of applications has been as follows :

	Males.	Females.	Sex not Stated.	Total.
Applications to date.....	273	248	9	530
Admitted.....	159	144	303
Deferred for want of room.....	114	104	9	227
Remaining in Hospital, (being crowded to full capacity).....	105	97	202
Probable number waiting for room.....	80	70	150
Capacity needed now.....	180	170	350

The foregoing table gives a bird's eye view of the state of insanity within our boundaries. It also shows clearly the necessity which has compelled us so often to defer admissions. This has been an exceedingly unpleasant duty. In some instances the patients have been brought to our very doors, when it has been necessary to send them home again. In other cases, the applications have been made by relatives and friends coming in person to make all the appeal that affection or strong interest could dictate. And in many more the applications are backed up and supported by requests from those in positions of influence and power. It has been difficult, oftentimes, to pursue a course of unswerving duty, when such influences are brought to bear; but we have endeavored to do it as faithfully and wisely as our powers permitted.

NECESSITY FOR ENLARGEMENT.

The facts and figures in the preceding table and paragraph, are certainly sufficient to show the propriety, if not the imperative urgency, of resuming the construction of the building just so soon as it is in the power of the authorities to do it. Humanity demands it, and an examination of financial operations, to be given hereafter, will show that economy demands it.

OUR FINANCIAL CONDITION.

The amount which was in my hands at the end of the last fiscal year—

October 1, 1868—was.....	\$ 2,151 57
Receipts from the Treasurer.....	30,500 00
Receipts from other sources.....	567 07
Total.....	<hr/> \$33,218 65

The disbursements have been :

For transportation of patients.....	\$ 2,859 94
For current expenses proper	26,379 65
Total.....	<hr/> \$29,239 59
Leaving balance in my hand.....	<hr/> \$3,979 05
Current expenses per capita per annum.....	\$132 56
“ “ “ per week.....	2 54

This, it should be remembered, includes officers' salaries and all forms of expenditures for the patients while at the Hospital. We are unwilling to let these figures go to the world without explanations. As it is only about half the average cost at the other hospitals of the country, it might be inferred, without explanation, that our patients were not well provided for.

EXPLANATIONS.

First, We live to a considerable extent within ourselves. We furnish a goodly share of our own food, our potatoes, beets, beans, corn, cabbage and all other vegetables, most of our pork and bacon, much of our beef, veal, mutton, and poultry. We furnish our own fuel, dig and deliver our own coal from our own mines, about one hundred rods distant. We make all our own garments, for both males and females, knit our own hose, for which we spin our own wool.

We make the labor of patients largely available, both in-doors and out-doors. They are found upon the farm, in the garden, at the barn, they milk the cows, feed the stock, cut, split and bring in the wood. Both sexes help in the kitchen, bakery and laundry. They are so managed and treated that they feel contented. Many feel at home, take an interest in the general well being of the institution, and are ready to lend a helping hand when requested, or where needed.

They are largely trusted without special surveillance, more during the past year than ever before. Not less than from ten to fifteen per cent are at liberty to go and come at pleasure. Several have been allowed, singly or in small parties, to fish in the surrounding streams, along which they often stroll for three or four miles. A few have had full liberty to attend such churches in the village, on the Sabbath, as they chose.

Not a single violation of trust has ever yet occurred under these circumstances, and the efforts of some evil-disposed persons to persuade patients to elope, have signally failed. We have had but one elopement during the year, and that was from the house at night. Even from that person we received in a few weeks a letter so full of the richest Hibernian gratitude that we must copy a part of it :

“ * * * * But thanks to you—ten thousand thanks—for under your skillful treatment I am restored to society and the endearments of my friends. May God prolong your days to aid and relieve the inmates of that useful institution, and when a happy old age shall cause you to be laid amongst the tombs of your forefathers, may the green sod be laid lightly on your breast. * * *

Give my best wishes to your kind and benevolent wife. Tell her I am well, and wish all blessings on her and the family.

I am, dear Doctor, your most obedient, &c.

_____”

To return to our explanations—

Secondly, We are twenty-three miles from a railroad, and though we often deplore it, yet it greatly contributes to economical living. Our country supplies are at low figures. The best of beef at from 5 to 8 cents per pound net; mutton at 4 to 6; dressed turkeys and chickens, 6 to 8; butter, 15 to 20; eggs, 10 to 15; and other marketing in propor-

tion. Sorghum at 50 to 60 cents is preferred to foreign syrups. Wearing apparel, as country made lincens, flannels, jeans and blankets are without shoddy, and though bought at low figures, are very durable and economical.

Thirdly—It has been a season of *plenty*. Crops of all kinds have been large—and fruits, especially apples, have abounded. These have entered largely into our bill of fare—used raw at all hours,—then baked, roasted, stewed—in dumplings, pies and puddings. We have never before realized so fully, how an abundant apple crop contributes to cheap and healthy living—for never have we had a healthier household.

Lastly.—That great staple of human sustenance—*flour*—has been down to about half the prevailing price of two to five years since. Of this, and all other articles of sustenance from foreign sources, we always procure the best quality, for in this, there is the greatest economy. This is proven by long experience. Of groceries—as sugars, teas and coffee, we procure the very best. For the latter, we never use substitutes or an inferior grade.

Are not the good care of patients, their happiness and contentment—as well as the economy of management, sufficiently shown in the preceding paragraphs?

ACKNOWLEDGMENTS.

Since our last report we have been the recipients of some very special favors. A benevolent gentleman of New York city, Mr. John S. Pier-son, No. 11 Beekman street, has sought us out, and sent us a large addition to our library, about one hundred volumes of very readable and entertaining matter, quite in contrast with our Patent Office reports and other heavy documents; also a quantity of magazines and pictorial papers. At another time he sent us a stereoscopic instrument, and over one hundred very fine stereoscopic pictures—and very recently he has added a gift of some thirty large wall pictures, most of them colored lithographs from the well known establishment of Goupil & Co., New York city. He also proposes other bestowments in the future. He desires that “no consideration of safety from injury or destruction, shall cause the withholding of these means of amusement and interest from even the most excited and violent of the patients.” A most wise and well-considered request.

To our fellow-citizen, Mr. F. M. Chalfant, our excellent druggist, we are indebted for a magnificent gift of about fifty pictures for the walls. Many of them being large and fine engravings. These, with Mr. Pier-son's, are being framed and will soon beautify our elegantly constructed halls.

Who can measure the extent to which the soul, the mind, the heart, the intelligence and the affections may be influenced for good through

the eye alone,—to say nothing of the passing pleasure, and the breaking up of monotonous thought by this agency. A picture is a study,—it is a scrap of history—it is a sermon—or a rich anecdote—a lesson in natural history—a view of the world in detail—it is a display and lesson of the affections—the holy lesson of love—love for one another, and the holier one of love for the creator.

Many thanks to the donors of pictures,—and may our walls be literally covered

The American Bible Society, through the personal solicitations and energy of our venerable President, Nathan Goff, Esq., has made us a valuable donation of Bibles and Testaments, fifty of the former, and seventy-five of the latter. Our thanks in set phrase are certainly not needed for this liberality.

To certain parties in Wheeling, whose native reserve will not allow publicity, we are often indebted for supplies of reading matter, magazines, pictorials and other valuable contributions.

We thankfully express our obligations to the Editors and Publishers of the following magazines and papers for their continued kindness.

The Ladies Repository, (monthly), Cincinnati, Ohio.

“ Western Christian Advocate, (weekly), Cincinnati, Ohio.

“ Religious Telescope, “ Dayton, Ohio.

“ Pittsburg Advocate, “ Pittsburg, Pa.

“ Wheeling Intelligencer, “ Wheeling, West Va.

“ National Telegraph, “ Clarksburg, West Va.

“ Union Banner, “ New Creek, West Va.

“ Mason County Journal, “ Point Pleasant, West Va.

And occasional numbers of other journals.

CHAPEL SERVICES.

These have been continued during the past year with great regularity and are well attended by the patients. We are under continued and great obligation to the several clergymen of the vicinity for their gratuitous services on these occasions. Also to such transient sojourners of the clerical profession, as have freely given us aid, when practicable.

For faithful services of all who are engaged in duties to the institution, in whatever capacity, our cordial thanks are hereby tendered.

To the Board of Directors, for their sympathetic and harmonious co-operation in directing the affairs of the institution, and kindly receiving our suggestions, from time to time, we are especially grateful.

OF OUR WANTS AND ESTIMATES.

Of these our chapter will be brief.

We need a Reservoir for water at some point on the hill-side, in the rear of the Hospital, with the necessary means of supply and discharge.

We need also renovation and improvement in our Laundry.

3—INSANE ASY. REP.

ESTIMATES FOR THE NEXT FISCAL YEAR.

For current expenses proper.....	\$31,200 00
“ Transportation of Patients.....	2,500 00
